

School District	School	Contact Name	email	Phone	HS Materials Used	Length of Use	MS Materials Used	Elementary	Strengths	Weaknesses
Hillsboro	Montgomery	Amber Stevens		503-844-1500 ext 6121	McDoug / Lt	5	Holt MS	Harcourt	MS to HS transition, covers standards, special suppliments ESL are strong	Needs more problem solving
Parkrose		David Whitfield	david_whitfield@parkrose.k12.or.us		Discovery - Key Curriculum Press	6	Impact	Bridges and Trailblazers	Good for stronger students,	Only used as a guide for curriculum, Teachers primarily using wksts, etc..
N Clackamas		Jeremy Shibley	shibleyj@nclack.k12.or.us		Discovery - Key Curriculum Press	?	Connected Math	Connected Math	Geo book is good	Poor opinion of Algebra book
Evergreen	Union	Scott Campbell		360-713-4205	McDougall Little's Integrated Mathematics, Book 1, 2 and 3 (2002); Merrill Advanced Mathematical Concepts (1994); Calculus with Analytic Geometry (1994) by Larson and Hostetler (5 th Edition)	9	Connected Math	Connected Math		Not well aligned with new state standards
Evergreen	Union	Melissa Holmes		360-604-7445	Integrated Series	9	Connected Math	Connected Math	Study Guide Supplements	Not enough practice, doesn't explain some concepts very well, Can't finish int1 in one year, Geo poor in Int 2, Int 3 and pre-calc have lots of repetition
Evergreen	Evergreen HS	Norm Freihauf		360-604-3700	Integrated Math 1-3, Pre-Calc by Houghton-Mifflin, Pre AP Alg2 by Heath, Calc Larson 5th ed.	6, 13, 13, 14	Connected Math	Connected Math		Our MS kids do not have many pre-requisite "skills". They will write about their math and can solve by guess and check. Due to calculator use they are not fluent in basic operations. Due to the interspersion of topics it takes strong teachers to make the connections of the mathematics in the Intergrated Courses. The formal proof is not well developed in the IM but it does have an introduction to it. We don't do constructions. The IM mostly emphasizes Algebra and Probability.
Gresham Barlow	Gresham High	Wendy Switzer		503-674-5500	Prentice Hall for Alg - Geo - Alg2	5	Addison Wesley		I'm happy with the variety of examples and practice problems. I feel like kids have an adequate number of problems for practice. There is vocabulary, but the algebra books are not too wordy for ELL students. The texts are pretty traditional which seems to work well for transfer students, as most come from traditional curriculums.	it is a little weak on integration. We have been supplementing with a 2-week review prior to CIM which has boosted scores a bit.

School District	School	Course Sequencing	Extra Support	Advanced Options	Do they prep for Stand Test	Parent, Student support
Hillsboro	Montgomery	Alg - Geo - Alg2 - Precalc - Calc - IB - AP	Retake if not passed, PLATO for credit recovery	Geo?	Comes with std test review packet, imbedded ACT/SAT practice, test generator	CD to upload at home (licenses), Non publisher websites
Parkrose		Pre Alg - Alg - Geo - Alg2 - PreCalc - AP Calc and Stat (Also and math concept instead of Alg2-diff text)	After school math lab 2x per week, AVID	Alg/Geo compressed to get ahead.	Review prior to test	They can check out books, Moodle
N Clackamas						
Evergreen	Union	: <u>Integrated 1, Integrated 2, Integrated 3, Pre-Calculus/Trigonometry, AP Calculus AB and AP Calculus BC: AP Statistics</u>	Teacher help and there are tutoring services offered by the district as well as a telephone Homework Helpline.	Advanced students can take Integrated 3 and Pre-Calculus/Trigonometry all in one year if they are willing to take two math classes during 2 nd semester.	None	The standard set of teacher materials that usually comes with textbooks, for example, extra practice worksheets, quizzes and tests, etc. The Integrated series comes with test generator software which I use.
Evergreen	Union	: <u>Integrated 1, Integrated 2, Integrated 3, Pre-Calculus/Trigonometry, AP Calculus AB and AP Calculus BC: AP Statistics</u>	Worksheet from Pazzaz workbooks and on –line websites to get extra practice and reinforce concepts		None	There are supplements for each book, but most of the resources and support used are not book related.
Evergreen	Evergreen HS	Two tracks with flow between them. IM 1 – IM 2- IM 3- PreCalc – AP Calculus Pre-AP IM1 – Pre-AP IM2 – PreAP Alg/Trig – AP Calculus IM1AB – IM1CD – IM2 – IM3	Our AB and CD split of IM1 is to help those students who are very weak as they come into our 9 th grade academy. <u>This is the major course intervention for students.</u>	Our Alg/Trig class coming after Pre-AP IM2 does a two year program second year algebra and Pre-Calc class in one year. It gets students ready for Calculus the next year.	We give practice WASL tests to 9 th and 10 th graders during <u>their math classes. We also do a little n=more writing in our math classes for those students.</u>	They have the usual test generators and teacher's editions plus supplemental projects, enhancements and more. We use a web Edline computer gradebook too.
Gresham Barlow	Gresham High	9th grade: Alg. 1 or higher, then Geo, Alg. 2, Precal or IB Math, Calculus This year we added Alg. 1.5 for students who need a 3rd year of math but are not ready for Alg. 2	We have a math tutoring center staffed by an individual with teaching/math credentials. This is a full-time position and has been a HUGE success at our school.	Pre-Calc, IB Math, Calc. I believe students can earn college credit through MHCC for Pre-Calc. and Calc. There is also a new program "ACE" which I know little about but students are taking math through this tech program. Of course there is also CAL.	They are o.k. We do have to supplement with prob./stats, geo, etc.	The definitions and examples are excellent. I feel that the text provides adequate instruction for students and parents to utilize when class is missed.

School District	School	Course Sequencing	Extra Support	Advanced Options	Do they prep for Stand Test	Parent, Student support
Gresham Barlow	Sam Barlow	Algebra I, Geometry, Algebra II	PLATO – online credit recovery program; lessons are co-taught with a SpEd Teacher: There is a new Algebra 1.5 (between Geometry and Algebra II) begin piloted – no text at this time. Roughly half of the students go into this class. Students can continue into Algebra II after this class.	Advanced Geo, AP Calc	State created tests and support	Test Materials – just "OK" ; PHSchools.com – online help session
Centennial	Centennial	Alg - Geo - Alg2	For Sophomores who are not at the Geometry level and have not passed the test, a second support class is offered. This is an online course (PLADO). Once students pass the test, they can move out of this class.	Advanced Geo, AP Calc	1. End of each chapter and supplemental standardized test banks.	"Standard" kinds of things, i.e. test banks, etc.
Forest Grove	FG High School	Alg-Geo-Alg 2	see insert	see insert	see insert
